## SP4T Absorptive RF Switch DC To 2.5 GHz Operation

The Honeywell HRF-SW1020 is a high performance single pole four throw (SP4T) absorptive RF switch ideal for use in wireless basestation and handset applications that require minimum power and minimum insertion loss.

The HRF-SW1020 is manufactured with Honeywell's patented Silicon On Insulator (SOI) CMOS technology, which provides the performance of GaAs with the economy and integration capabilities of conventional CMOS technology. These switches are DC coupled to improve lower operating frequency, frequency response and reduce the number of DC bias points required.

## LEAD FREE QFN SURFACE MOUNT APPLICATION

Please see Application Note AN310a for assembly process recommendations. The maximum soldering temperature of the -FL is $260^{\circ} \mathrm{C}$. Application Notes can be found at our website: www.honeywell.com/microwave

## CIRCUIT APPLICATION INFORMATION

These switches require a DC reference to ground. They may not operate properly when AC coupled on both the RF input and output without a DC ground reference provided as part of the circuit. See Application Note AN311.
